DETAILED ACTION

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance:

Claims 14,15,18,21 and 22 have been canceled.

Claims 1,2,8,12,13,19, have been amended, and containing limitation of allowable claims 9,16,20.

Regarding claim 1,2 and13, the prior art of the record in particular Kataoka'564 do not teach a supporting structure for a control apparatus for a vibration type actuator, including inter alia at least a frequency of the alternating signal as a speed control parameter, said control apparatus comprising: a driving circuit capable of changing a voltage of the alternating signal to be applied to said electro-mechanical energy conversion element and a control unit communicatively coupled to said driving circuit, wherein said control unit causes said driving circuit to change the voltage of the alternating: signal so that at least an absolute value of a slope of a frequency-speed characteristic of said actuator is within a desired range in a frequency band of predetermined range.

Regarding claim 8,12 and 19, the prior art of the record in particular Kataoka'564 do not teach a supporting structure for a control apparatus for a vibration type actuator, including inter alia at least a frequency of the alternating signal as a speed control parameter, a control unit communicatively coupled to said driving circuit. wherein said control unit controls said driving circuit ' in a frequency range higher than a

predetermined frequency so that the voltage of the alternating signal decreases as the predetermined frequency becomes a higher frequency.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
